About Me

Aspiring Computer Engineering graduate seeking an opportunity to apply technical knowledge and problem-solving skills while gaining professional experience.

Skills

- Programming: C++, Python, JavaScript (Node.js), Dart, MySQL
- Web & Mobile Development: React, Flutter, Tailwind CSS
- Backend: REST API development, JWT Authentication, Database design & queries
- Tools & IDEs: Git/GitLab, Postman, VS Code, Android Studio
- Concepts: UI/UX basics, Modular project structure
- AI & Data Annotation: LiDAR, 2D/3D annotation, dataset labeling, spatial measurements
- Additional: Networking setup & troubleshooting, Microsoft Office Suite, Basic video/audio editing, Cable assembly & hardware setup

Certificates

Cybercrime Caravan
DICT-CICC, USTP
August 10, 2017

CISCO Networks and IP Telephony
Rivan IT, Cebu City
December 7, 2019

EF SET English Certificate
C2 Proficient (75/100)
December 2024

Cybercrime Prevention Act of 2012 Seminar
LDCU
August 20, 2019

Education

Bachelor of Science in Computer Engineering

Phinma - Cagayan De Oro College 2018-2022

High School Diploma

Misamis Oriental General Comprehensive High School 2010–2014

Experience

Full-Stack Developer (Freelance / Personal Projects) 2025

Completed a full-stack Point-of-Sale (POS) system for a local retail store, with a user-friendly interface and a reliable backend. The system includes login access, role-based dashboards, and customer management. Worked closely with store management to customize features for daily operations such as sales, inventory, and basic reporting.

Flutter Developer (Startup Contributor) – PERATI 2023 – Present

Developed mobile features using Flutter, including card transactions, balance checks, and fare payments. Implemented UI components, managed state, and structured code for scalability, while collaborating with the team to plan, prototype, and refine features during ongoing development.

Data Labeler (Freelance) – micro1 2025

Responsible for analyzing video content and providing accurate descriptions, labels, and tags for AI and machine learning applications. Collaborates with the team to maintain annotation quality and consistency across datasets.

QA (Freelance) - Remotasks 2020-2025

Worked on multiple AI projects involving autonomous vehicles, pedestrians, and LiDAR datasets, performing 2D and 3D annotation tasks. Labeled and validated LiDAR and other datasets to ensure high accuracy and consistency, gaining experience across diverse workflows and contributing to AI model development and dataset quality.

AI Data Annotator (Architectural Floor Plan Project) – Outlier AI 2024

Annotated and measured architectural floor plans, including windows, doors, and walls, to create accurate datasets for AI model training. Ensured consistent labeling across contributors, identified errors to improve dataset quality, and suggested improvements to annotation tools and workflow.

Technical Support Intern – Microtrade GCM Corporation 2020

Performed computer hardware repairs and maintenance, provided technical support for software and hardware issues, and assisted with basic CCTV monitoring and system maintenance while following company service protocols.
